### Public School Student, Staff, and Graduate Counts by State, School Year 1998-99

Contact: Ghedam Bairu (202) 502-7304 How many students were enrolled in elementary and secondary public schools in 1998-99? How many staff members were paid to teach, supervise, and provide support services for education? How many students graduated from high school in the previous year, 1997-98? What was the racial/ethnic background of students enrolled in public schools in 1998-99? The information to answer these and other questions is reported in the National Center for Education Statistics "State Nonfiscal Survey of Public Elementary and Secondary Education, School Year 1998-99."

## How many students were enrolled in public elementary and secondary schools?

In school year 1998-99, there were 46.5 million students enrolled in public elementary and secondary schools in the 50 states and the District of Columbia (table 1). Of these students, 25.9 million were in prekindergarten through grade 6, an additional 20 million were in grades 7 through 12, and the remaining 0.7 million were ungraded students. (The five outlying areas, the Department of Defense Dependent Schools and the Bureau of Indian Affairs schools are not included in national totals.)

California had the most public elementary and secondary school students (5,926,000), followed by Texas (3,945,000) and New York (2,877,000). The three lowest student counts were in the District of Columbia (72,000), Wyoming (95,000), and Vermont (105,000).

### How many teachers were there?

About 2.8 million full-time equivalent teachers provided instruction in public elementary and secondary schools in the 1998-99 school year (table 2). Among this group, 1,568,000 were elementary school teachers (including prekindergarten and kindergarten teachers) and 1,013,000 were secondary school teachers. The remaining 245,000 teachers taught ungraded classes or were not assigned a specific grade.

The ratio of total students to total teachers for the nation was 16.5 students per teacher. These ratios ranged from lows of 12.8 students per teacher

U.S. Department of Education
Office of Educational Research and Improvement NCES 2000-330

in Vermont and 13.2 in Maine to highs of 22.4 in Utah and 21.0 in California. The median student per teacher ratio was 15.7:1, that is, about half of the states had a student/teacher ratio equal to or greater than 15.7:1, and half had a lower ratio. Student/teacher ratios should not be interpreted as average class size since not all teachers are assigned to a class (for example, music and reading teachers in elementary schools).

# How many staff supervised or provided support services for public education?

In addition to the teachers enumerated previously, about 587,000 teachers' aides directly assisted teachers in providing instruction (table 3). An additional 37,000 instructional coordinators and supervisors helped teachers through curriculum development and in-service training. Support staff for students included 93,000 guidance counselors and 52,000 librarians. This translates to about 500 students for every guidance counselor reported, and 891 students for each librarian. An additional 1,281,000 staff members provided support services for These services included food, students. health. library assistance, maintenance. transportation, security, and other services in the nation's public schools. There were 129,000 school administrators (mostly principals and assistant principals), 51,000 school district administrators, and about 360,000 administrative support staff.

The relative distribution of all staff is illustrated in figure 1. Instructional staff (teachers, instructional aides, and coordinators) made up 63.7 percent of all staff. Another 26.3 percent of all staff (librarians, counselors, psychologists, and other support staff) provided support services to schools and students. Administrators and administrative support staff made up 10

percent of all education staff. On the average, there were 16 teachers and 13 other staff for each administrator. All of these distributions and ratios vary greatly from state to state.

## How many students graduated from high school during the 1997-98 school year?

Some 2,458,000 students received regular high school diplomas in the 50 states and the District of Columbia during the 1997-98 school year and subsequent summer (table 4). An additional 141,000 students received other (alternative) high school equivalency certificates (this group includes only those who are 19 or younger). National totals for alternative and high school equivalency certificate recipients and other completers represent an undercount due to missing data in some states. Finally, some 38,000 students received some high school completion certificate other than a diploma. (Note that some states grant only regular diplomas and the high school equivalency certificates).

# What is the racial/ethnic background of students enrolled in public schools?

In school year 1998-99, there were 46.5 million students enrolled in public elementary and secondary schools in the 50 states and the District of Columbia. Of these students. 533,000 American Indian/Alaskan were 1,828,000 Asian/Pacific Natives, were Islanders, 6,939,000 were Hispanics. 7,923,000 were Black/Non-Hispanics, and 29,142,000 were White/Non-Hispanics (table 5).

Table 6 presents the numbers of students by racial/ethnic category receiving a regular high school diploma for 1997-98. The U.S. totals could not be computed by race/ethnicity because data were missing for nine states.

#### **Technical Notes**

The "State Nonfiscal Survey" is an annual state-level collection of high school graduation counts and student, staff counts, for prekindergarten through grade 12. The data are collected from state education agencies (SEAs), processed and edited by the U.S. Bureau of the Census, and then verified by NCES. The "State Nonfiscal Survey" is part of the Common Core of Data collection.

All staff counts (including teachers) are in full-time equivalency units. This is the amount of time required to perform an assignment stated as a proportion of a full-time position. It is computed by dividing the amount of time employed by the time normally required for a full time position.

All states and outlying areas provided data for this survey. However, state agencies vary in their data collection and reporting systems, with resulting variations across states.

Students previously reported as other diploma recipients were included in the category of regular high school graduates for 1997-98. The categories were combined because they both included students receiving a regular high school diploma.

Schools operated by the Bureau of Indian Affairs (BIA) were separated from the state public education reports in 1998-99. This accounts in part for declines in students and staff when the numbers are compared with those of previous years. Counts for BIA schools are reported with counts for outlying areas and DOD dependent schools.

Values for prekindergarten students and staff that were missing and not reported elsewhere by the states were imputed. These items are noted as "imputed" in the data tables. The method used for imputing all variables other than prekindergarten students was to: (a) create a subset of states reporting the item in question: (b) calculate the ratio of the missing item to total student membership for each state in the subset; (c) calculate the average ratio of item to membership; (d) multiply the total student membership of the state with the missing item by the average ratio; substitute the imputed estimate for the missing item and then recompute the subtotals and totals. Missing prekindergarten student counts were imputed by first calculating an average ratio of prekindergarten students to total students minus prekindergarten students for reporting states, and then by following steps d and e above. Totals and subtotals are footnoted in the tables when one or more items included in the total are imputed or adjusted.

Several states collapsed two or more categories of staff into one. In these cases, NCES disaggregated this number by distributing the reported amount to the several categories based on the average distribution of these staff in other states.

NCES made no adjustments or imputations to the high school graduate, high school equivalency or other high school completion data.

#### For further information

For information about this *Statistics in Brief* or the complete data set, contact Ghedam Bairu via e-mail at ghedam\_bairu@ed.gov. This report can be downloaded from the NCES Web Site at <a href="http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2000330">http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2000330</a>

#### **Definitions**

**Administrative Support Staff:** This category consists of staff members who provide direct support to local education agency and school administrators. This includes secretarial and other clerical staff, and persons whose activities are concerned with support of the teaching and administrative duties of the office of the principal or department chairpersons, or central office administrators.

**High School Equivalency Recipients:** These are individuals age 19 or younger (except in Minnesota where they are ages 20 or younger) who received a high school equivalency certificate during the previous school year or subsequent summer. This is a formal document certifying that an individual met the state requirements for high school graduation equivalency by obtaining satisfactory scores on an approved examination, and met other performance requirements (if any) set by a state education agency or other appropriate body.

**Membership Count:** This comprises the total student enrollment on October 1 (or the closest school day to October 1) for all grade levels (including prekindergarten and kindergarten) and ungraded pupils. Membership includes students both present and absent on the measurement day.

**Other High School Completers:** These are individuals who received a certificate of attendance, or other certificate of completion, in lieu of a diploma during the previous school year and subsequent summer school.

**Other Student Support Staff:** This category consists of library support staff, professional and supervisory staff (e.g. school psychologists and social workers) providing non-instructional services to students, and support services staff not reported in other categories, (e.g., data processing, health, building and equipment maintenance, bus drivers, security, and food service workers).

**Regular High School Graduates:** These are those graduates who received a regular diploma during the previous school year and subsequent summer school. A regular diploma recognizes that the recipient has successfully completed a prescribed course of studies at the secondary school level.

**Teachers of Ungraded Classes:** This category includes teachers of classes or programs without standard grade designation.

**Ungraded students:** These are students who are assigned to programs or classes without standard grade designation. States are requested to report teachers of ungraded classes even if all students are assigned a grade level of record (for example, Florida).

**Elementary/Secondary Teachers:** States report teachers in these categories. They do not necessarily reflect standard grade groupings.

Figure 1.—Distribution of elementary and secondary education staff by category: School year 1998-99

Note: Details may not add to 100% due to rounding.

Prekindergarten data imputed based on current year (fall 1998) data; total membership includes imputed data. Grades 1 through 3 and ungraded disaggregated from reported total based on distribution in other states. The Virgin Islands do not have a prekindergarten program.

NOTE: U.S. totals include the 50 states and the District of Columbia.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, State Nonfiscal Survey.

<sup>4/</sup> BIA data subtracted from state totals.

Prekindergarten data imputed based on current year (fall 1998) data; this affects total student membership.

NOTE: Teacher counts are full-time equivalency (FTE) counts. Elementary and secondary teacher counts are not directly comparable across states due to differences in the grades included in these designations. U.S. totals include the 50 states and the District of Columbia. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, State Nonfiscal Survey.

<sup>2/</sup> Data disaggregated from reported total.

The Virgin Islands do not have a prekindergarten program.

BIA data subtracted from state totals.
Data missing or not applicable. 4/
